WWW.SUPERSUCKER.CA

PROJECT OUTLINE:

- Sand bedding/annual inspection material removal
- Day 1: Twyere/Furnace Floor - 35 yards vac'd
- Day 2: Twyere/Furnace Floor - 18 yards vac'd + Heat Exchanger 4 yards of ash/dust vac'd
- Day 3: Wind Box - 20 yards vac'd
- 100 ft remote hose work

THE RIGHT TOOL FOR THE JOB:

SUCTION EXCAVATOR

Truck positioned near closest access to building interior containing incinerator

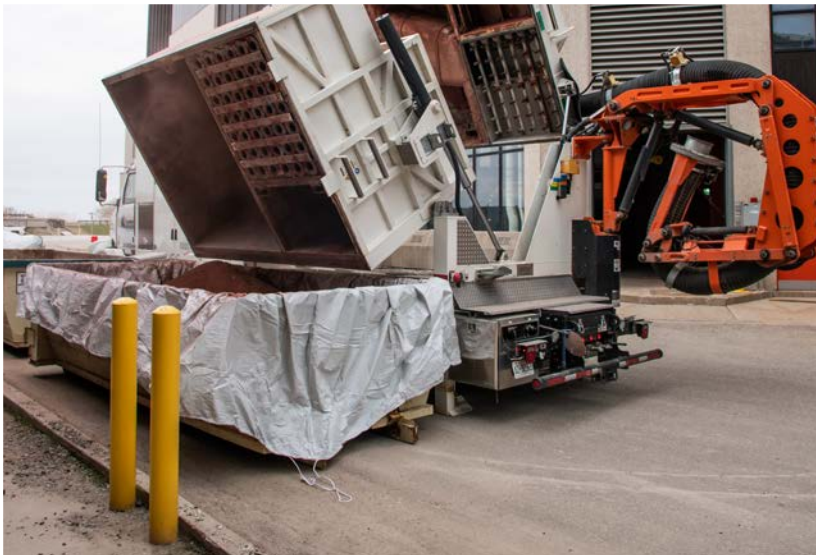

Hose reaches all parts of the incinerator interior for a thorough cleaning.

SUCTION EXCAVATOR ADVANTAGE:

1. Expert dryvac operators
 - Extensive subject matter expertise
2. On site dumping for logistical efficiencies
 - No wasted time driving to dump site
3. Optimal dig rate of 4 yards per hour
 - Industry norm 2 yards per hour

Dry spoils bin is lined due to the fine consistency of excavated materials.

Dry material is dumped into on site bins, and removed from site while truck continues to work.

THE RIGHT TOOL + THE RIGHT PEOPLE

- = **Dry material dig rate INCREASE - 50% faster.**
- = **On site dumping 34% productivity increase.**
- = **Significant project savings.**

THE RIGHT PEOPLE FOR THE JOB:

Fully trained and certified staff ensure a superior service. We understand the requirements specific to your industry - whether it's construction, environmental, industrial, gas, hydro, or telecommunications.

SERIOUS ABOUT CONFINED SPACE SAFETY.

TRAINING:
